Education

Master of Science in General Engineering (*Diplôme d'Ingénieur Grande École*)

ENSAE (National School of Statistics and Economic Administration) - IP Paris

September 2024 – Present
Palaiseau, France

- Leading institution in graduate education in statistics, machine learning, finance and data science
- Relevant Coursework** (GPA 4.0) : Stochastic processes, Probability theory, Statistics, Optimisation, Macroeconomics and microeconomics, Econometrics, Surveys, Sociology, Simulation and Monte Carlo methods, Linear Time Series
- Volunteering** : Vice-President of Fem'ENSAE (feminist association), Ticketing Coordinator (Arts Student Association)
- International Mobility**: Master's in Machine Learning for Health (UC3M, Madrid), 2026–2027 academic year

Bachelor's Degree in Mathematics and Computer Science

Sorbonne University, Faculty of Science and Engineering

September 2021 – Mai 2024
Paris, France

- Valedictorian** at the end of the 1st year: Formal Sciences, *Mention très bien* (highest honors) for every academic year

Internships

EMBL's European Bioinformatics Institute (University of Cambridge)

Pathogen Informatics and Modelling group, supervised par John Lees

June 2026 – August 2026
Hinxton, United Kingdom

- Recipient of an Excellence Scholarship from the French Embassy in the United Kingdom; *Project on pangenomic analysis, in progress*

Collège de France – Research assistant

Ecology & Evolution of Health Team (CIRB), supervised by Samuel Alizon and Olivier Supplisson

June 2025 – August 2025
Paris, France

- Deployed an **R-Shiny** interface for visualising the spatial epidemiology of genital ulcers attributable to herpes simplex viruses in France
- Introduced to advanced statistical methods, including **hierarchical Bayesian modelling** and generalised additive models

git Projets

Women at the top: Who earns the highest salaries?

ENSAE, Applied statistics development project, supervised by Bertrand Garbinti (CREST)

October 2025 – May 2026
Palaiseau, France

- Analysed **gender representation** at the top of the wage distribution (**Top 10% / 1% / 0.1%**) in France, identifying differences across sectors, occupations, age groups, and firm characteristics
- Applied statistical, econometric, and machine learning methods, including descriptive analysis, linear and non-linear regressions, **Oaxaca-Blinder decomposition**, and **predictive modelling** of access to very high wages

Determinants of children's health in the US

ENSAE, Python for Data Science, supervised by Romain Avouac (INSEE)

December 2025 - January 2026
Palaiseau, France

- Lead a statistical, economic and temporal study on children's health in the US based on the **NSCH survey** 2021 - 2024 and economic state level data from the Bureau of Economic Analysis
- Implemented **MCAs** (Multiple Correspondence Analysis) and **PCAs** (Principal Component Analysis), constructed a synthetic **health index**, and produced geospatial visualizations to highlight temporal and regional disparities

Professional experiences

Olympic Family assistant

Volunteer in the GFS team of Paris 2024

July 2024 – August 2024
Paris, France

- Provided **linguistic assistance** to the designated member, Mr. Barry Hendricks (President of SASCOC, South Africa)
- Assisted the designated member in their activities, facilitating **logistics** and **organization** using Paris 2024-specific applications and software, primarily for transportation management

Skills

Technical Expertise Python (Pandas, NumPy, Scikit-learn), C, R (inlabru, INLA), SAS, SQL, Java, OCaml, HTML, UNIX, Gurobi, Git, LaTeX
Languages Bilingual in French and Romanian, Advanced in English, Notions in Spanish

Interests

Design Website design and analogue photography
Sports Fencing and fitness (as part of my studies at ENSAE)
